

# RITSEC

Security Through Community

RITSEC is a club dedicated to teaching security through our community. We meet for four hours every week. The first hour is dedicated to educational slides that introduce areas of security that students normally do not learn about until their 3rd year. The second hour provides hands-on demos to give students real-world experience with the areas presented in the first hour. Our last two hours give our members the opportunity to present on what they have been researching. This gives the rest of the club a chance to learn new things and to celebrate our members.

In addition, RITSEC hosts three competitions every year: the RITSEC CTF in the fall, ISTS in the early spring, and IRSeC in the late spring.
